## **ACKNOWLEDGMENT**

It gives me great pleasure in submitting this project entitled “**FOODIFY**” as a part of the curriculum of BCA (Semester VI).

We avail this opportunity to express my heartfelt gratitude to a Person who extend their full support and co-operation in developing this project and also imparting Knowledge to me in various other domain of software technology.

We would like to take opportunity to thank my collage, **VIMAL TORMAL PODDAR BCA COLLEGE, Surat.** for giving me this tremendous opportunity to work in the real-time project.

We heartily thank my project guide, **Prof. Gaurav Naykar** who was always there to guide me through the development of the project. He is one of the major sources behind the success of the project. We immensely appreciate the tips he has constantly given us during the project. It was an enormous pleasure to work with him.

We are thankful to the faculty of the institute for their constant guidance not only during training period but also throughout college career.

Finally, we would like to thank **My Parents** for their support throughout the project. We owe a special debt to our family & friends for their support blessing and encouragement for me.

-Bhavsar Divya

-Diyora Krisha

# 1. INTRODUCTION

## 1.1 Project Description

## 1.2 Project Profile

## 1.1 Project Description

The aim of developing Foodify project is to replace the traditional way of taking orders with computerized system. Another important reason for developing this project is to prepare order summary reports quickly and in correct format at any point of time when required. Foodify Service has a very lot of scope.

This PHP project can be used by any restaurants or fast foods for customers for keeping their order records. This project is easy, fast and accurate. It requires less disk space. Online vegetable store Service uses MYSQL Server as backend so there is not any chance of data loss or data security.

## Characteristics Of the Project

- 1. User Friendly:** Food Service is a very user-friendly project because the delivery Ordering Record and searching from categories is very simple, fast and data is secured. The user interface of the project is very simple.
- 2. Order reports:** Order reports of the system can be easily generated. User can generate the report of any particular date and period. In this way they can get delivery status of customers and get information about what is being ordered.
- 3. Very less paper work:** Foodify Service requires less paper work. In this project all record is fetched directly into the computer and reports can be generated through just a click. In this way it saves time. As data is directly entered into computer so there is no need to do any paper work.
- 4. Computer operator:** controls Foodify service is operated by the staff members and one admin so there is no chance of clerical mistakes. Data feeding and retrieving in this system is very easy. So, the work can be done on time.

## 1.2 Project Profile

Project Title		Online Vegetable Store
Front-End		Php
Back-End		MySQL
Language		Php, Java Script, Css , jQuery , Html , Ajax
Platform		Windows
Submitted To		Vimal Tormal Poddar BCA College PandeSara, Surat.

## 2. ENVIRONMENT DESCRIPTION

### 2.1 Hardware & Software Requirement

## 2.1 Hardware Requirement

Processor	Minimum Dual processor
RAM	512 MB
Hard Disk	512 GB
Monitor	Colour Monitor
Internet Connection	Minimum 512kbps

## 2.1 Software Requirement

Browser	Microsoft Internet Explorer, Mozilla, Google Chrome
Operating System	Windows 11
Software	Xammp
Database	PhpMyAdmin v3.3.0

## **3. PROPOSED SYSTEM**

**3.1 Scope**

**3.2 Project Modules**

**3.3 Module Wise Objectives**

**3.4 Expected Advantages**

## 3.1 Scope

### The main scope of the project is:

- It allows customers to create account and login through online.
- The account will be accessible to the authorized customer i.e. who have the valid username and password.
- It also allows us check for order food, show order status, add feedback, provide facility to select favourite restaurants.
- and annual statements.

### Customer will include following operations:

- View Account Details
- View order details
- View past orders
- Order placed
- View order slip
- Place order any time
- Pay Online Bill

## 3.2 Project Modules

There are several modules which have been used in project and they all have their own functionalities which are as follows:

- Dashboard Module
- Reg Users Module
- Delivery Category Module
- Delivery Menu Module
- Orders Module
- Reports Module
- My Accounts Module
- Cart module

### • **Dashboard Module:**

In this section, admin can see all detail in brief like a total order, not confirmed order, confirmed order, total delivery being prepared, Total delivery pick up, Total delivery delivery, Total cancelled orders, and Total user.

### • **Reg users Module:**

In this section, admin can manage the registered user (view/update).

### • **delivery category Module:**

In this section, admin can manage the delivery category (Add, delete and Update).

- **delivery menu Module:**

In this section, admin can manage the delivery menu (Add, delete and Update)

- **Order Module:**

In this section admin can view the delivery order details and they have also the right to change order status according to current status.

- **Reports Module:**

In this section admin can view order details, order counts, and sales reports according to dates.

- **My accounts Module:**

In this section, user can his/her password, view and update his/her profile and log out from accounts. In this section, the user can also view order history.

- **Cart Module:**

In this section, user can add the delivery which he/she want to order and also delete the already added delivery items.

### 3.3 Module Wise Objectives

- There are various objectives which are both handled on user side as well as on Visitor side and it became more user friendly as for it also allows Admin with some specific features.

## 3.4 Expected Advantages

- **High Security:**

There is high security mechanism provided by the proposed system. No unauthorized person can make change in the data those are stored in website. Only authorized person can change and can make login.

- **Less Time Required:**

In our website, all the processes are carried by computer so obviously it will require time than traditional inventory system and, in that sense, it will require less time to complete transaction and can process data very fast.

- **High Amount of Accuracy:**

In our web system there are less number of human activities are involved in that case it will have less effect in our accounts. The website will perform all calculation and manipulation automatically; In that case the data that we receive will be accurate and much more reliable than the generated previously.

- **Easy to use:**

This Website is gives different Business and user select functionalities easily. Business Can Easily Sign in and Sign Out. You can also have the benefit It Related Business. You Can Easily see Business Profile. You can Easily Review and Rating

## 5.1 Database Design

### ➤ Introduction

- **Database:**

A Database is collection of related data, which can be of any size and complexity. By using the concept of Database, we can easily store and retrieve the data. The major purpose of a database is to provide the information, which utilizes it with the information's that the system needs according to its own requirements.

- **Database Design:**

Database design is done before building it to meet needs of end-users within a given information-system that the database is intended to support. The database design defines the needed data and data structures that such a database comprises  
The database is physically implemented using MySQL.

- MySQL database
- Full database

The screenshot shows the phpMyAdmin interface for the 'food' database. The left sidebar lists various tables under the 'food' schema, including favourite, feedback, item, menu, offers, ordered\_item\_details, payment, restaurants, slider, s\_admin, tbl\_order, user, and user\_address. The main panel displays a table of all 13 tables in the database, showing details like rows, type, collation, size, and overhead.

Table	Action	Rows	Type	Collation	Size	Overhead
favourite	Browse  Structure  Search  Insert  Empty  Drop	3	InnoDB	latin1_swedish_ci	48.0 Kib	-
feedback	Browse  Structure  Search  Insert  Empty  Drop	3	InnoDB	latin1_swedish_ci	48.0 Kib	-
item	Browse  Structure  Search  Insert  Empty  Drop	95	InnoDB	latin1_swedish_ci	48.0 Kib	-
menu	Browse  Structure  Search  Insert  Empty  Drop	22	InnoDB	latin1_swedish_ci	32.0 Kib	-
offers	Browse  Structure  Search  Insert  Empty  Drop	4	MyISAM	latin1_swedish_ci	3.7 Kib	280 B
ordered_item_details	Browse  Structure  Search  Insert  Empty  Drop	19	InnoDB	latin1_swedish_ci	48.0 Kib	-
payment	Browse  Structure  Search  Insert  Empty  Drop	14	InnoDB	latin1_swedish_ci	32.0 Kib	-
restaurants	Browse  Structure  Search  Insert  Empty  Drop	8	InnoDB	latin1_swedish_ci	32.0 Kib	-
slider	Browse  Structure  Search  Insert  Empty  Drop	9	MyISAM	latin1_swedish_ci	2.3 Kib	-
s_admin	Browse  Structure  Search  Insert  Empty  Drop	1	MyISAM	latin1_swedish_ci	2.0 Kib	-
tbl_order	Browse  Structure  Search  Insert  Empty  Drop	14	InnoDB	latin1_swedish_ci	64.0 Kib	-
user	Browse  Structure  Search  Insert  Empty  Drop	1	InnoDB	latin1_swedish_ci	16.0 Kib	-
user_address	Browse  Structure  Search  Insert  Empty  Drop	2	InnoDB	latin1_swedish_ci	32.0 Kib	-
13 tables	Sum				408.0 Kib	280 B

- Favourite

The screenshot shows the phpMyAdmin interface for the 'favourite' table within the 'food' database. The top bar shows the query: 'SELECT \* FROM `favourite`'. The main panel displays the table structure with columns f\_id, res\_id, and u\_id, showing three rows of data.

	f_id	res_id	u_id
Edit  Copy  Delete	5	78	17
Edit  Copy  Delete	6	79	17
Edit  Copy  Delete	7	85	17

## ➤ Feedback

The screenshot shows the phpMyAdmin interface for the 'feedback' table in the 'food' database. The table structure includes columns: f\_id, res\_id, o\_id, rate, and date. Three rows are displayed:

	f_id	res_id	o_id	rate	date			
<input type="checkbox"/>	Edit	Copy	Delete	6	79	72	5	2023-04-03 20:38:27
<input type="checkbox"/>	Edit	Copy	Delete	7	79	75	5	2023-04-03 22:24:06
<input type="checkbox"/>	Edit	Copy	Delete	8	80	79	5	2023-04-05 08:50:56

## ➤ Item

The screenshot shows the phpMyAdmin interface for the 'item' table in the 'food' database. The table structure includes columns: id, m\_id, res\_id, item\_name, item\_desc, image\_name, price, quantity, status, date, and availability. Twenty-four rows are displayed:

	id	m_id	res_id	item_name	item_desc	image_name	price	quantity	status	date	availability
<input type="checkbox"/>	340	175	82	Dark forest	delisious	(2023-03-31)(10-06-43)choco_pasta_8_11zon.jpeg	200	1	Accepted	2023-03-31	1

## ➤ Offers

The screenshot shows the 'Offers' section of the FOODIFY dashboard. On the left, there's a sidebar with icons for Dashboard, Manage Users, Manage Store, Offers (which is selected), and Reports. The main area has a blue header with the title 'Offers'. Below the header is a table with columns: Offer Code, Status, Offer Text, Valid User, Expire Time, Max Usage, Discount Type, and Min Amount. There are four rows of data:

Offer Code	Status	Offer Text	Valid User	Expire Time	Max Usage	Discount Type	Min Amount
WELCOME50	Enabled	Get 50% discount On Your First Order	newuser	18 Aug 07:15:am	1	percent	100
SUMMERSPECIAL	Enabled	20% off on Summer season	alluser	06 Sep 10:00:am	1	percent	200
FOODIFY_SPECIAL	Enabled	10% Discount on all cake	alluser	29 Sep 09:00:am	5	flat	100
HAPPYHOLIDAYS	Enabled	30% off on your first order	alluser	30 Nov 08:35:am	3	flat	200

At the top right of the main area, there are three small icons: a bell with a '3', a person icon, and a gear icon. To the right of the icons is a blue button labeled '+ CREATE OFFER'.

## ➤ Create Offer

The screenshot shows the 'Create Offer' form. The sidebar on the left is identical to the one in the previous screenshot. The main form has a blue header with the title 'Offers'. It contains several input fields and dropdown menus:

- Offer Code:** EXAMPLE:WELCOME50
- Display Text:** 50% off on First Order
- Expire Date&Time:** Date \_\_\_\_\_ Time \_\_\_\_\_
- Select Users:**  All  Only For New User
- Max Usage:** Max Usage of this offer: Example - 5 times
- Discount Type:** Flat
- Minimum Order amount:** ₹ 0
- Flat Discount Amount:** ₹ 0

At the bottom of the form are two buttons: 'CANCEL' (red) and 'CREATE OFFER' (blue).

## ➤ Disable Offer

The screenshot shows the FOODIFY dashboard with the 'OFFERS' section selected. A modal window titled 'Offer Details' is open, displaying the following information for the offer 'WELCOME50':

Offer Detail	Value
ID	28
Offer Code	<b>WELCOME50</b>
Offer Text	Get 50% Discount On Your First Order
Valid Users	Newuser
Maximum Usage	1
Discount Type	Percent
Min Discount	100
Max Discount Amount	100
Discount Percentage	50
Discount Amount	50
Status	<b>Enabled</b> <a href="#">Disable</a>
Expire Date & Time	18 August,2023 07:15

## ➤ Offer Details

The screenshot shows the FOODIFY dashboard with the 'OFFERS' section selected. A modal window titled 'Offer Details' is open, displaying the following information for the offer 'WELCOME50':

Offer Detail	Value
ID	28
Offer Code	<b>WELCOME50</b>
Offer Text	Get 50% Discount On Your First Order
Valid Users	Newuser
Maximum Usage	1
Discount Type	Percent
Min Discount	100
Max Discount Amount	100
Discount Percentage	50
Discount Amount	50
Status	<b>Enabled</b> <a href="#">Disable</a>
Expire Date & Time	18 August,2023 07:15

## ➤ Manage Store

The screenshot shows the 'MANAGE STORE' section of the FOODIFY platform. On the left, there's a sidebar with icons for Dashboard, Manage Users, Manage Store, Offers, and Reports. The main area has tabs for 'MANAGE STORE' and 'MANAGE ITEMS'. A dropdown menu shows 'All' selected. Below it, a list titled 'RESTORANTS | 8' shows six entries: 1. Indianium, 2. Ice Bliss, 3. Chinese Brew, 4. Area Food, 5. Cake corner, and 6. Pizza Bites. Each entry has a right-pointing arrow icon. At the bottom, there are two blue buttons labeled '1' and '2'.

## ➤ Notification of Item & Restaurant

The screenshot shows the FOODIFY dashboard. On the left, there's a sidebar with icons for Dashboard, Manage Users, Manage Store, Offers, and Reports. The main area features three cards: 'Users' (2), 'Orders' (14), and 'Profit' (₹ 5460). To the right, a sidebar displays three notification alerts: 'New DARK CHOCOLATE Item is Added', 'New VEGETABLE SOUP Item is Added', and 'New MOMOS Item is Added'. Below these, a section titled 'Slider' contains a table with seven rows, each with a 'View Image' link and a delete icon. A green button labeled 'ADD SLIDER' is at the top right of this section.

## ➤ Store Accept

The screenshot shows the FOODIFY platform's dashboard. On the left, there's a sidebar with icons for Dashboard, Manage Users, Manage Store, Offers, and Reports. The main area is titled 'MANAGE STORE' and 'MANAGE ITEMS'. A dropdown menu shows 'All' selected. Below it, 'RESTORANTS | 8' is listed. The first item, '1. Indianium', is highlighted with a blue background and a right-pointing arrow. To its right, a card displays the store's details: 'Accepted', a photo of various Indian dishes, the name 'Indianium', address 'vesu,surat', city 'SURAT', email 'indianium@gmail.com', mobile '1234567897', owner name 'INDIAN', and delivery charge '₹ 20'. At the bottom right of the card are 'Reject' and 'Accept' buttons.

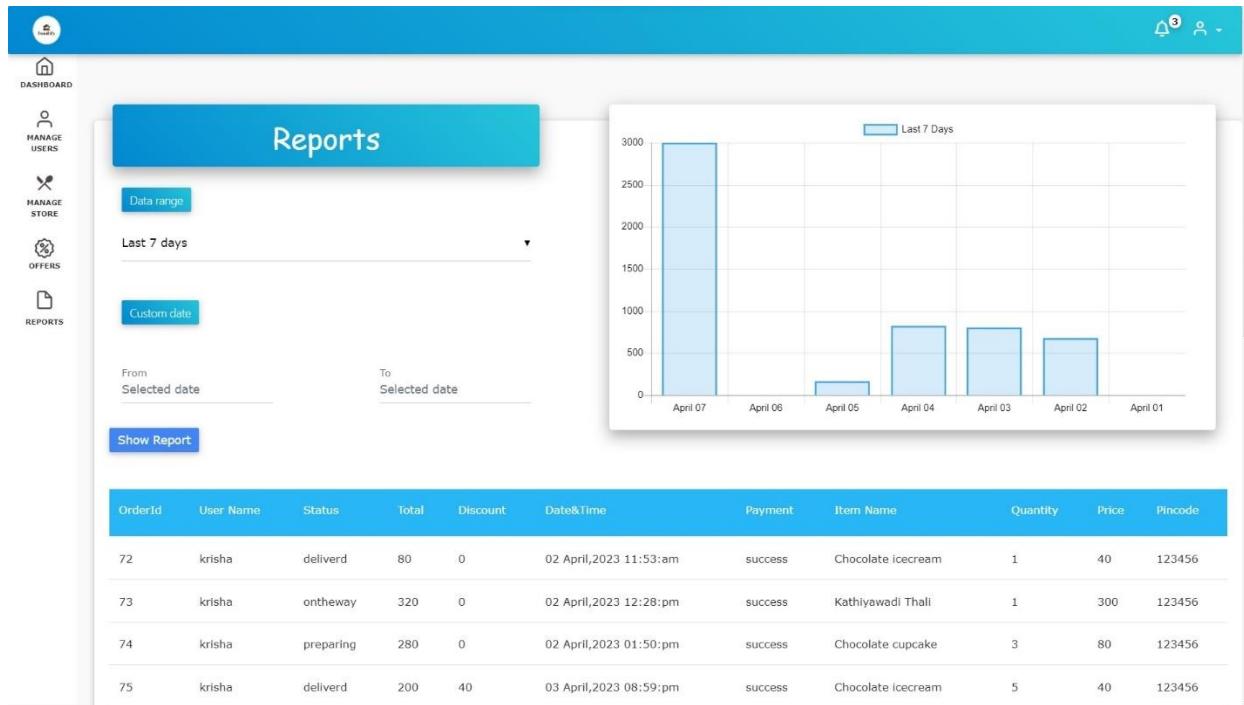

## ➤ Store Reject

This screenshot is similar to the previous one but shows a rejected store. The store 'Indianium' is listed in the 'Rejected' section. The card displays the same information as before, but the 'Accept' button is now greyed out and labeled 'Accept' in green, while the 'Reject' button is active.

## ➤ Item Status

Rec No	Menu Name	Store Name	Name	Status	Date	Image	price	quantity

## ➤ New Order

The screenshot shows the FOODIFY POS software interface. On the left, there's a sidebar with icons for Order, Menu, Dashboard, FeedBack, and Reports. The main area has tabs for NEW, PREPARING, ON THE WAY, and PAST ORDER. A blue box highlights the NEW tab. Below it, two new order entries are listed:

- New Order (2023-04-07 10:13:53)**: Chocolate icecream (x 3) and Vanilla Icecream (x 3).
- New Order (2023-04-07 10:14:42)**: Mango Icecream (x 3).

A sidebar on the right shows notifications: "New Order Received At 10:13" and "New Order Received At 10:14".

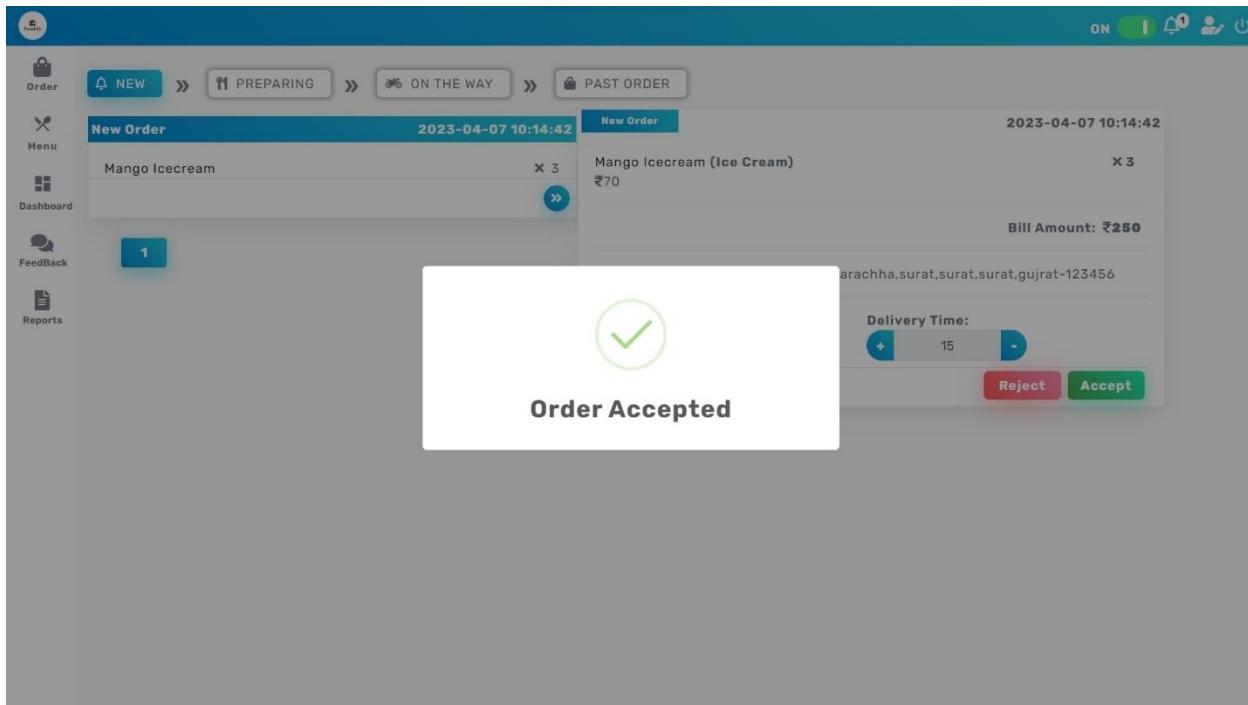

## ➤ Order Accept

This screenshot shows the same interface after accepting the first order. The NEW tab is now highlighted in blue. The accepted order details are displayed:

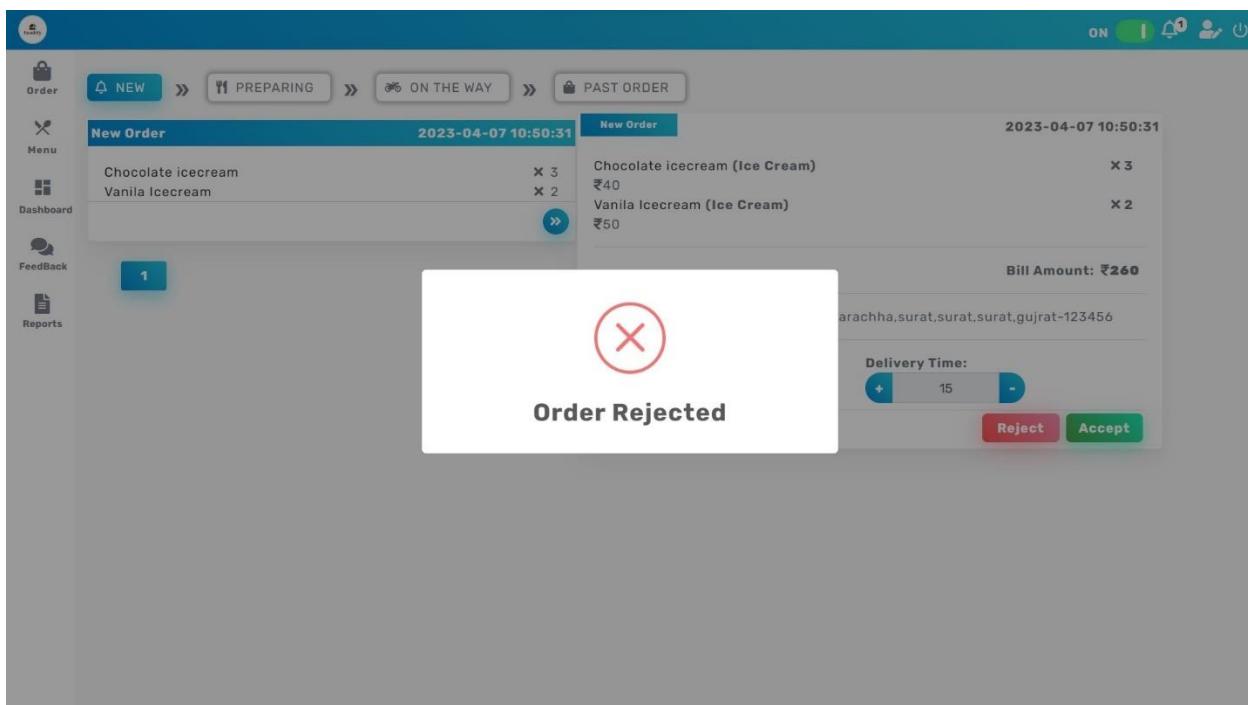

- New Order (2023-04-07 10:13:53)**: Chocolate icecream (Ice Cream) (x 3) at ₹40 and Vanilla Icecream (Ice Cream) (x 3) at ₹50.
- New Order (2023-04-07 10:14:42)**: Mango Icecream (x 3).

The total bill amount is shown as ₹310. The address is listed as "Address: sudama chowk.mota varachha,surat,surat,surat,gujrat-123456". Preparation and delivery times are both set to 15 minutes. There are "Reject" and "Accept" buttons at the bottom.

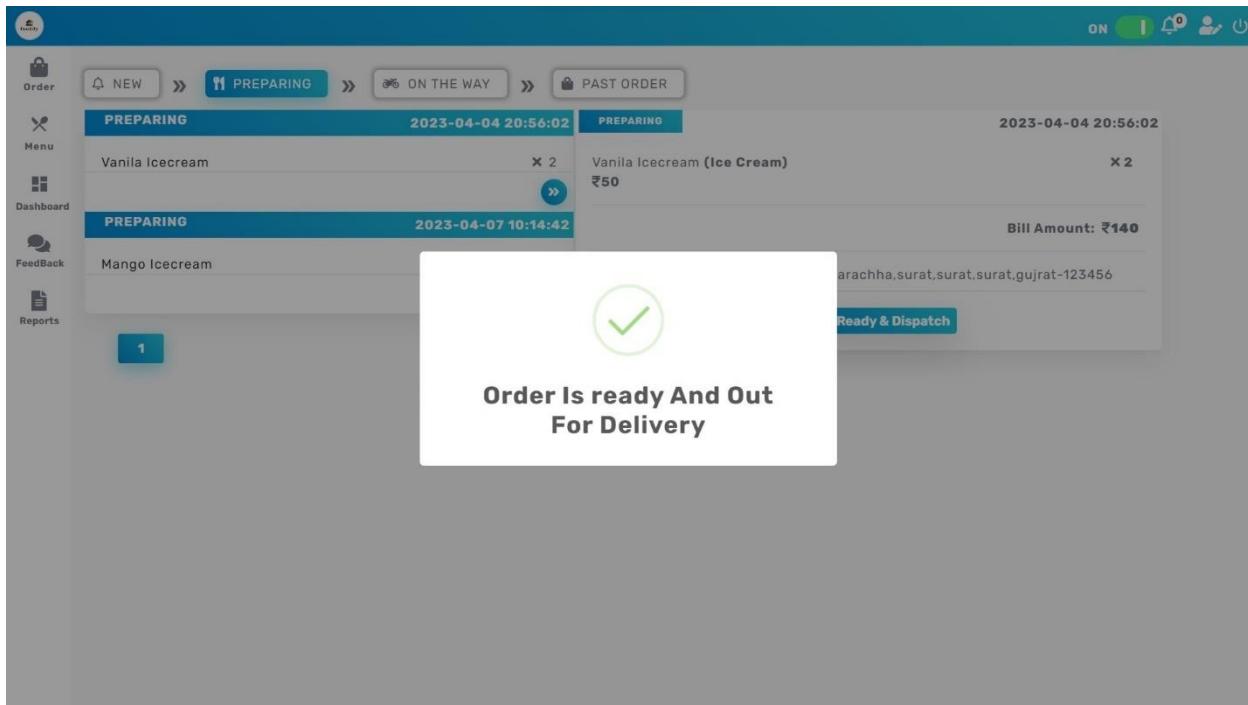

## ➤ Order Accept pop up

## ➤ Prepare Order

## ➤ Deliver Order

## ➤ Past Order

The screenshot shows the 'Past Order' section of the FOODIFY application. At the top, there are navigation tabs: NEW, PREPARING, ON THE WAY, and PAST ORDER (which is highlighted). Below these are two order entries:

- Order 1:** Chocolate icecream x 1. Bill Amount: ₹80. A 'VIEW DETAILS' button is present.
- Order 2:** Chocolate icecream x 5. Bill Amount: ₹200. A 'VIEW DETAILS' button is present.

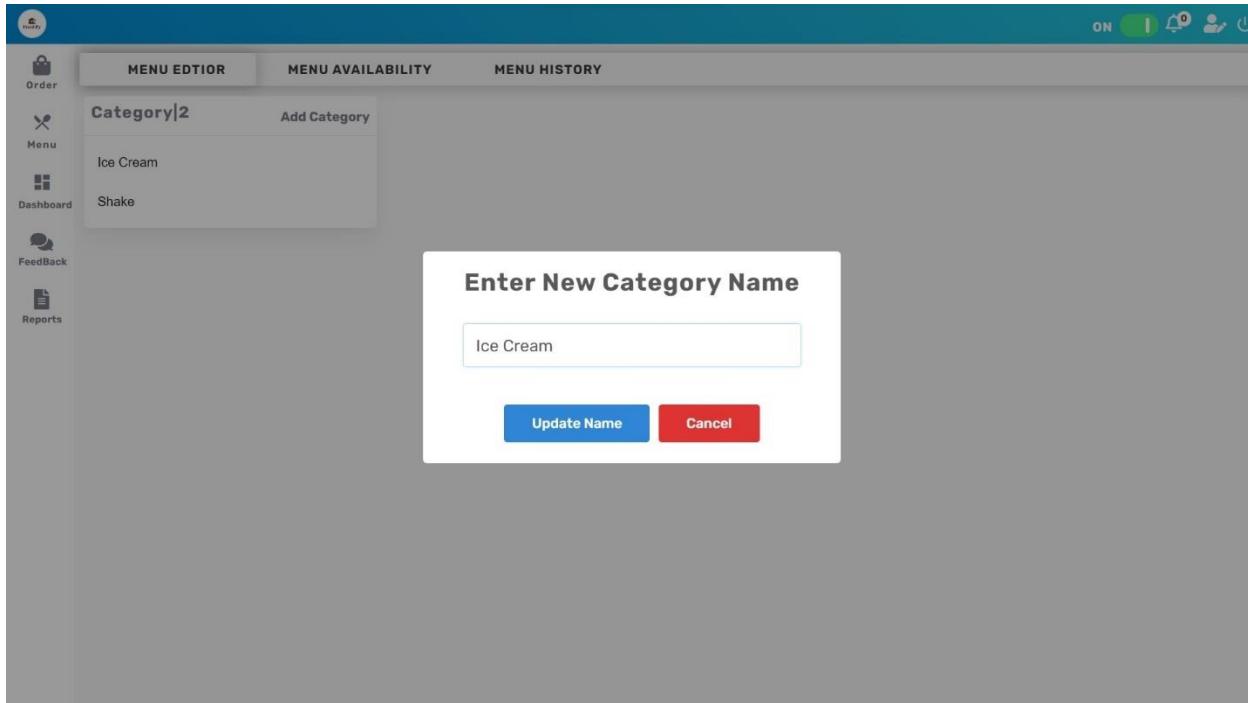

A pagination bar at the bottom shows pages 1, 2, and 3, with page 1 being active.

## ➤ Add Category

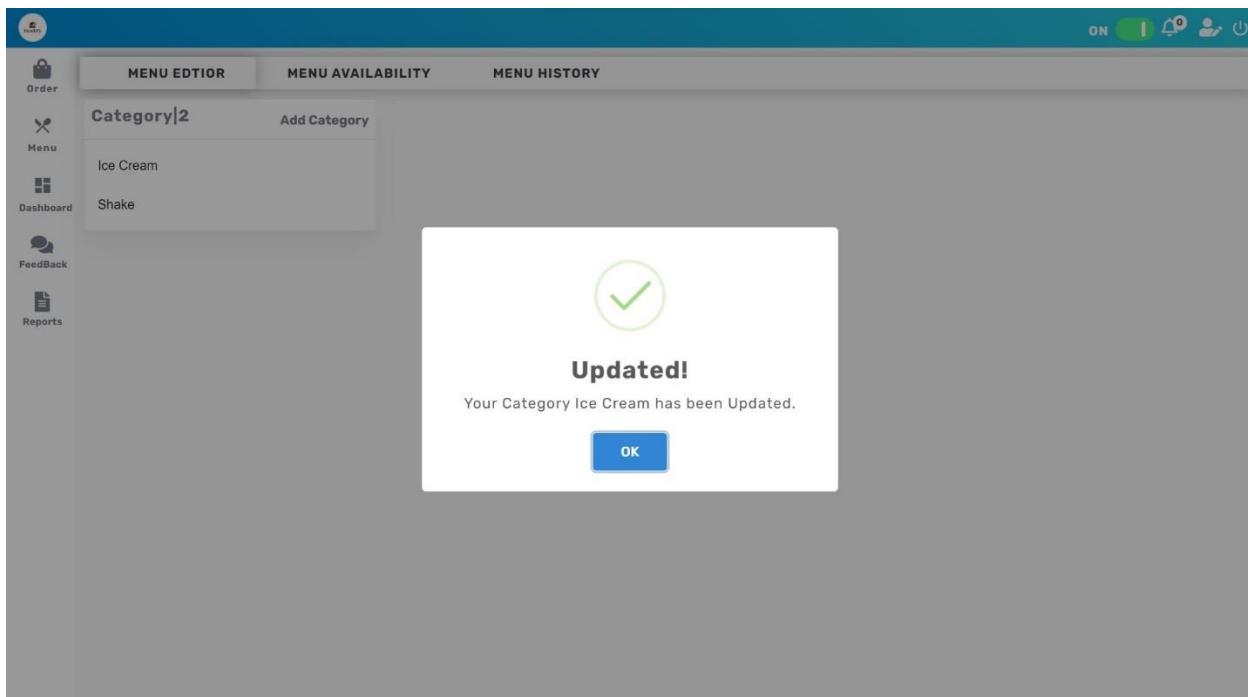

The screenshot shows the 'Add Category' dialog box from the FOODIFY application. The dialog has a title 'Add Category' and a sub-instruction 'Enter Category Name:'. It contains a text input field and two buttons: 'Close' (red) and 'Add' (blue).

In the background, the main interface shows a 'Category' list under 'MENU EDITOR' with items: Ice Cream and Shake. There are also tabs for 'MENU AVAILABILITY' and 'MENU HISTORY'.

## ➤ Dashboard

This dashboard displays key performance metrics for a restaurant. The top section shows four main statistics: Orders (10), Profit (₹ 3520), Category (2), and Item (10). Below these, a bar chart titled "This Week Sales Chart" illustrates weekly sales, with a single orange bar reaching approximately 80 units on Sunday.

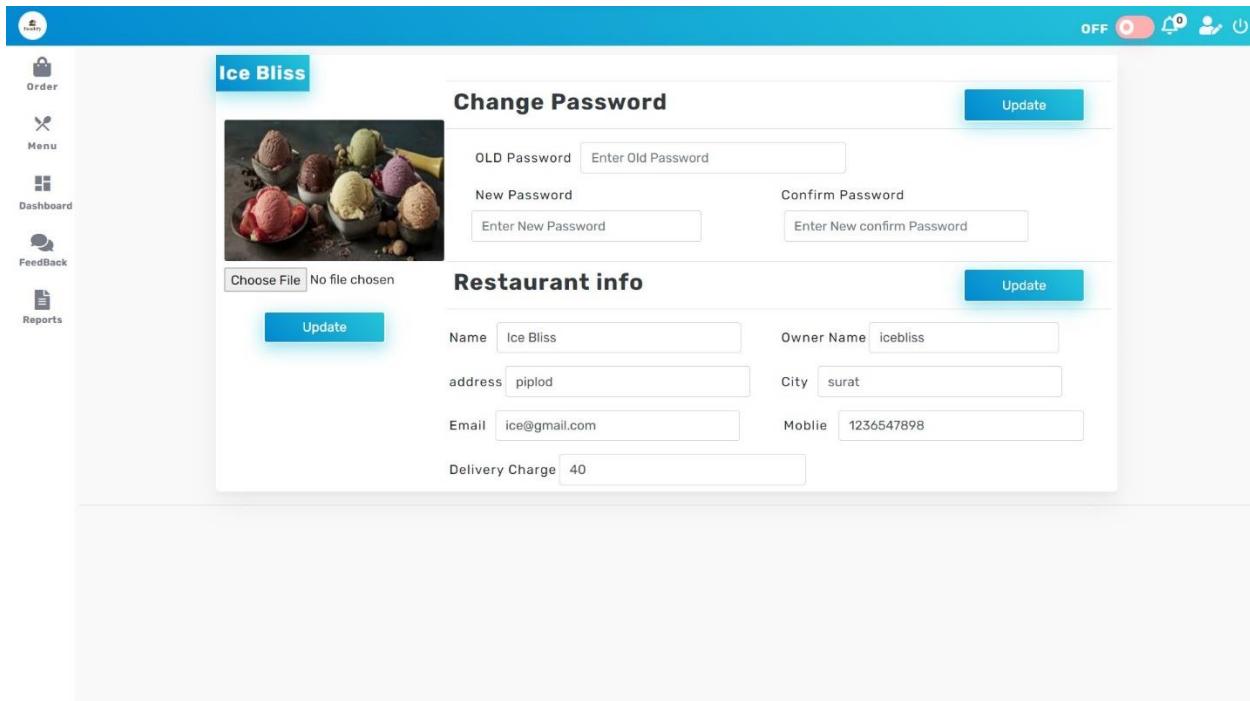

Category	Value
Orders	10
Profit	₹ 3520
Category	2
Item	10

## ➤ Restaurant off

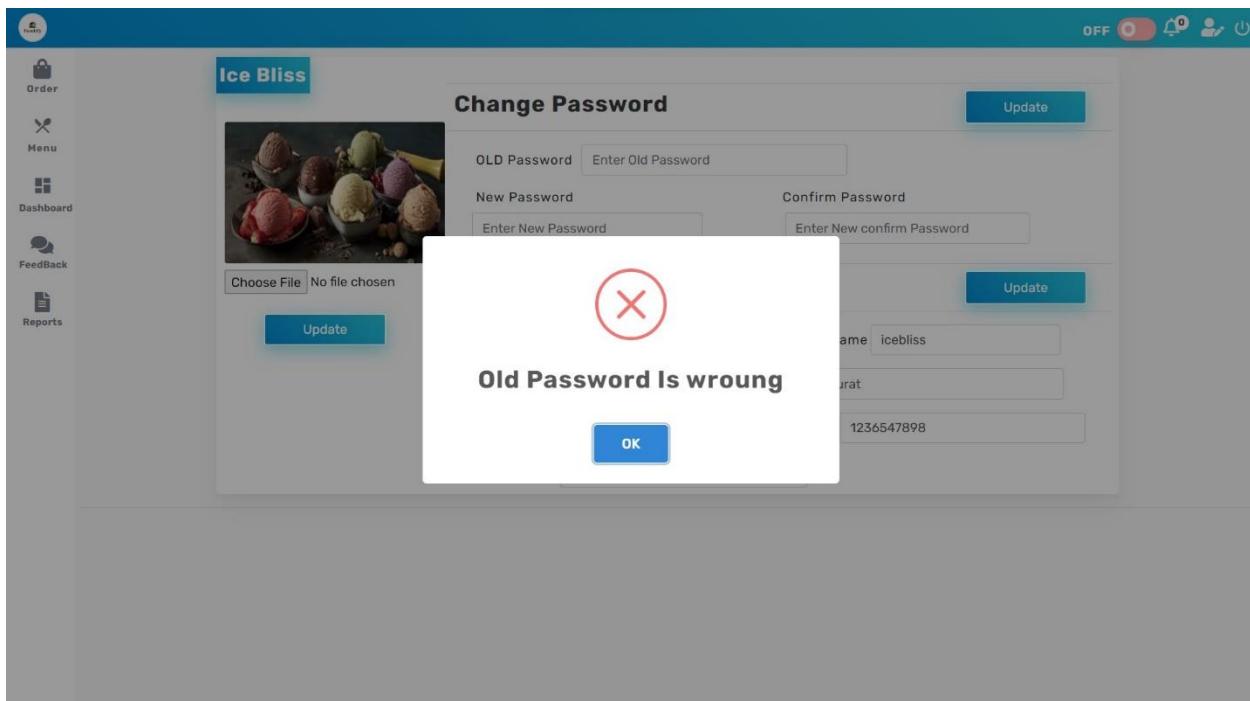

This dashboard is identical to the previous one but with a key difference: the status indicator at the top is set to "OFF". The other metrics—Orders (10), Profit (₹ 3520), Category (2), and Item (10)—remain the same. A weekly sales chart is also present.

Category	Value
Orders	10
Profit	₹ 3520
Category	2
Item	10

## ➤ Report

The screenshot shows the FOODIFY Reports interface. On the left, a sidebar menu includes Order, Menu, Dashboard, FeedBack, and Reports. The Reports section is active, displaying a "Reports" header and two tabs: "Data range" and "Custom date". Under "Data range", "Last 7 days" is selected. Under "Custom date", the "From" field is set to "1 April, 2023" and the "To" field is set to "7 April, 2023". A "Show Report" button is present. To the right, a bar chart titled "Last 7 Days" shows daily sales volume from April 01 to April 07. Below the chart is a table of order details:

OrderID	User Name	Status	Total	Discount	Date&Time	Payment	Item Name	Quantity	Price	Pincode
72	krisha	deliverd	80	0	02 April,2023 11:53:am	success	Chocolate icecream	1	40	123456

77	krisha	deliverd	680	0	04 April,2023 05:35:pm	success	Dark Chocolate	6	100	123456

## ➤ Select Time Period

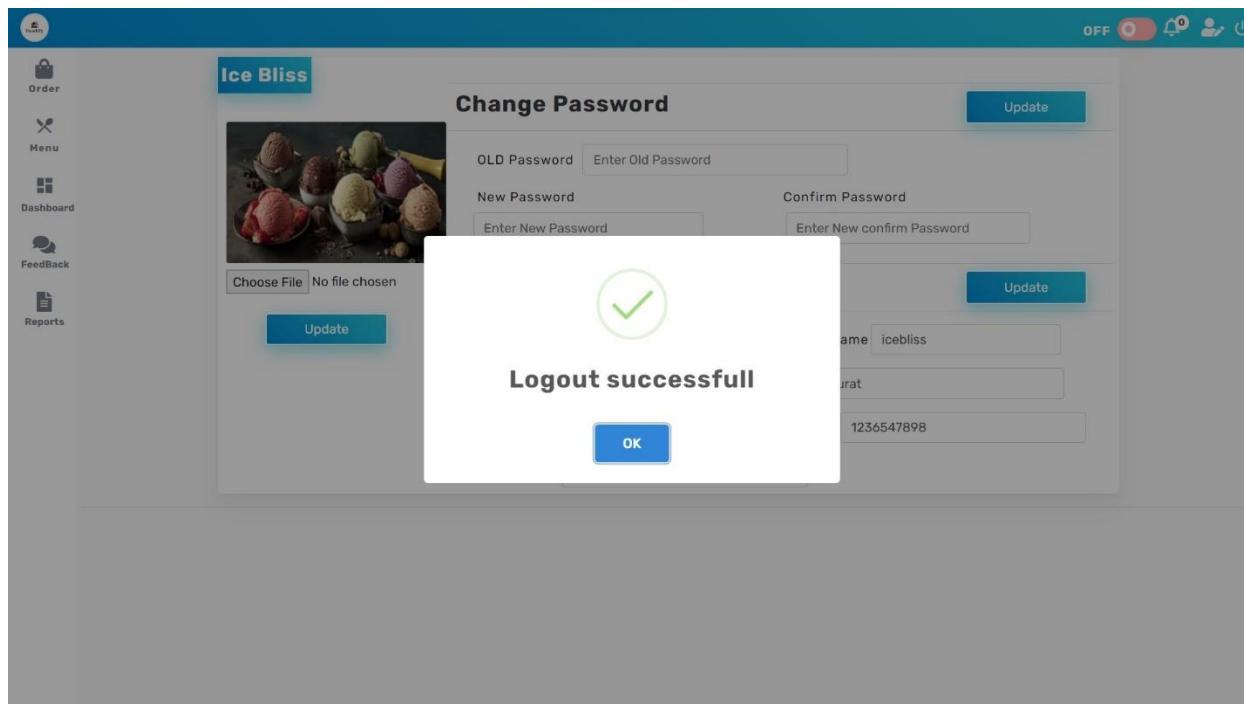

The screenshot shows the FOODIFY Reports interface with a date picker modal open. The modal displays the date "Saturday APR 01 2023" and a calendar for April 2023. The date "01" is highlighted in blue. Navigation arrows are at the top and bottom of the calendar. Below the modal, the "Reports" header and "Data range" tab are visible, showing "Last 7 days". The "Custom date" section shows "From 1 April, 2023" and "To 7 April, 2023". A "Show Report" button is present. To the right, a bar chart titled "Last 7 Days" shows daily sales volume from April 01 to April 07. Below the chart is a table of order details, identical to the one in the first screenshot.

## ➤ Download Report

The screenshot shows a software interface titled "FOODIFY" at the top. On the left, there is a vertical sidebar with icons for Order, Menu, Dashboard, FeedBack, and Reports. The main area displays a table of data with the following columns: ID, Name, Status, Quantity, Price, Date, Result, Item, Count, Price per Unit, and Order ID. The data consists of nine rows, each representing a different transaction or item. At the bottom of the table, there are four buttons: "EXPORT TO TXT" (grey), "EXPORT TO PDF" (red), "EXPORT TO EXCEL" (green), and "EXPORT TO JSON" (blue).

	ID	Name	Status	Quantity	Price	Date	Result	Item	Count	Price per Unit	Order ID

Below the sidebar are icons for Facebook, Instagram, and Twitter.

## ➤ Footer

The screenshot shows the Foodify website's footer section. It features a dark background with white text and links. On the left is the Foodify logo. The footer is divided into several sections:

- Inquiry** (links to About us and Contact us)
- How it Works** (links to Choose restaurant, Choose meal, Enter your location, Pay via Net Banking, and Wait for delivery)
- Pages** (links to Home, Offers, and Search)
- Popular locations** (links to Surat, Ahmedabad, Vadodra, Rajkot, Navsari, and Valsad)

At the bottom, there are social media icons for Facebook, Twitter, Google+, and YouTube. A copyright notice at the very bottom reads: "© 2020 Copyright: Foodify.com".

## ➤ User Add New Address

The screenshot shows the Foodify mobile application interface. On the left, there is a modal window titled "ADD NEW ADDRESS" with fields for "Address Name", "Address Line", "Landmark", "City", "State", and "Pincode". An orange "ADD ADDRESS" button is at the bottom. On the right, a user profile card for "SAHIL" is displayed, showing the address "sudama chowk,mota varachha,surat,udhana,Surat,gujral-123456" and buttons for "EDIT" and "DELETE". The top navigation bar includes a search icon, offers icon, user profile "krisha", and a cart icon with "0".

## ➤ Favourite Restaurant

The screenshot shows the Foodify mobile application interface for user "krisha". The top navigation bar includes a profile icon, search icon, offers icon, user profile "krisha", and a cart icon with "0". Below the navigation, the user's name "krisha" is displayed along with their contact number "1236547895" and email "krisha@gmail.com". A section titled "Your Favorites Restaurants" lists two favorite places: "INDIANIUM" (Ice Cream) and "ICE BLISS" (Ice Cream). Each listing includes a small image of the food, the restaurant name, a category, and a rating star icon.

## ➤ Order Detail

The screenshot shows the Foodify mobile application interface. At the top, there is a header bar with the Foodify logo, a search bar, and a user profile section for 'krisha'. Below the header, the main content area is titled 'Past Orders' and displays a list of previous deliveries. Each order card includes a thumbnail image of the food, the restaurant name, the location, the number of items ordered, the bill total, and the status (e.g., WAITING FOR CONFIRMATION, PREPARING, DELIVERED, ON THE WAY). Buttons for 'TRACK ORDER' and 'VIEW DETAILS' are also present.

Order Details	Status

Indianium surat	ON THE WAY

## ➤ Order Reject

This screenshot shows the same Foodify application interface as the previous one, but it highlights a specific order that has been rejected. The order from 'Ice Bliss' in Surat, which contained 2 items worth ₹600, is marked with a red 'REJECTED' status. A modal window on the right side provides more details about the rejection:

- Tracking Status:** Your Order Is Rejected By Ice Bliss
- Message:** Your Amount Is Refunded To Your Bank Account Within 5-7 days.
- Order Details:**
  - Strawberry Icecream × 2 ₹120
  - Kitkat Shake × 2 ₹160
  - Bill Total: ₹600**
- Address:** sudama chowk,mota varachha,surat,udhana,Surat,gujrat-123456
